GM 1.4L engines may be equipped with either a HENGST® or an UFI® manufactured oil filter housing and cap. Each housing is unique and requires a specifically designed filter to function properly. The filters for the differing oil housings are not interchangeable and if incorrectly used may lead to serious engine damage.

The HENGST® housing is equipped with a bypass valve located in the housing’s post.

WIX Filters recommends the 57674 oil filter for the GM 1.4L Engine with the HENGST®

The UFI® housing is not equipped with a bypass valve. The bypass valve is located in the oil filter.

The WIX replacement filter for the GM 1.4L Engine with the UFI® housing is currently under development.

As a reminder, it has always been, and remains our recommendation that the selection of a replacement filter be conducted using only the most current application information available. In today’s cataloging, the electronic resources (i.e. Internet, Interactive electronic) would be the most current application information available. For questions or more information, please contact your local WIX Filters District Manager or call Product Information at 1.800.949.6698
