

WIX 24042 Product Construction Update

Previous 24042

Updated 24042

A change in manufacturing location has resulted in an appearance change for the WIX 24042 water absorbing fuel filter. The metal endcap of the former construction has been replaced with a glass-filled nylon endcap. This filter, intended for GoldenRod® Fuel Systems, continues to fit and provide excellent performance for all cataloged applications.

WHY DO YOU NEED THIS FILTER?

The chemistry of the Ultra Low Sulfur Diesel fuels of today make them more susceptible to water contamination than the fuels of the past.

Water in the fuel can cause poor engine performance and reduce fuel economy.

Excessive amounts of water in the fuel system will damage your equipment.

ALSO AVAILABLE: WIX 24380
