Fuel/Water Separator Bowl

Bowl threads are 3 3/4-10 (female)
Can be used w/ 33231, 33440, 33773,
33755 and 33788

Fuel filter bowls are now available for open style fuel/water separators. Extracted water levels can now be visually monitored allowing for more accurate routine service intervals. Bowls are equipped with an easy access drain valve for water removal and a sensor port for applications that require them.

Installation Tip:

Fuel/Water separator filters, and the bowls that fit them, require gaskets to prevent fluid leaks. Gaskets may be round, square, or beveled cut. Follow the manufacturer's guidelines for correct placement and orientation when seating the gasket.
